

Super Air Knife

A quiet, hard-hitting curtain of air for blow-off, cleaning, drying and cooling.

Available in aluminium, type 303 stainless steel and type 316 stainless steel in standard lengths from 3" (76mm) through to 54" (1372mm) in single piece construction and from 60" (1524mm) up to 96" (2438mm) in two piece construction. Special lengths and unlimited system lengths are also available. PVDF (Poly-vinylidene Fluoride) Super Air Knives, which offer superior strength and resistance to corrosion, are available in lengths from 3" (76mm) through to 54" (1372mm). Applications: part drying after wash; sheet cleaning in strip mills; conveyor cleaning; part or component cooling; web drying or cleaning; environmental separation; pre-paint blow-off; bag opening/filling operations; scrap removal on converting operations.
